Programming with Data Structures: College class that went over different ways to interpret and read data

Web Development: College class that went over HTML, CSS, and JS

Progrexion Sale Representative - April 2021 - December 2021:

As a summer job, I became a sales representative for Progrexion which did sales for Lexington Law, a credit repair agency. This job not only taught me how to grab peoples' attention but it also taught me a great deal on how the economy works because they worked in credit. I performed well at this job and was able to be pretty consistent towards the end of my time there. That job also taught me how to deal with angry or upset customers because no one is happy to hear their credit isn't good.

Education

(High School Diploma) Heritage Academy, Mesa, AZ (2014-2020)

(General Associate's Degree) Rio Salado Community College, Tempe, AZ
(2016-2020)
(Bachelors in Computer Science) Brigham Young University-Idaho
(2020-present)

- Summary I am persistent. I am a trustworthy person who shows up early. I am a well educated scholar and healthy both physically and mentally. I am a hard-worker, kind, respectful, individualistic but responsive to others, and determined.
- Connections Steel Wool Studios is a company that I respect through and through. The games that are put. I love this company and everything they have done for their loyal customers including me. This company also cares about each individual worker, their problems, and even their families which is really such a good thing to have.
